

Quick Biography of Photos Made Perfect

My name is Claire Santos-Daigle. My husband Michael and I own "Photos Made Perfect", licensed in the state of California, in Chula Vista San Diego. Michael has an Associates of Science Degree in Manufacturing Engineering from Thames Valley State Technical College in Norwich, CT along with a Bachelor of Science Degree in Mechanical Engineering from Roger Williams College in Newport, RI, and currently employed as a Quality Assurance Manager. We became involved with digital photo restoration when Michael started his genealogy in 1992 through to **1996 we began restoring family photos**. Family and friends said you should start a business and in **1999 we did** just that, with his technical skills and my background in Marketing.

Our customer base is **focused on genealogists and historical societies**. We are guest speakers on the topics of "Digital Image Editing" and "Photo Dating". We encourage members to bring their photos and at the end of the presentation we scan the photos of people who decide they rather have us restore them and contact them in a few days. No other restoration service brings their services to you. Many genealogists rather not leave their photos with any lab or trust mailing them anywhere. This is our mission statement.

Mission Statement

Our mission is to educate the public about digital image editing. We want to be a part of restoring your family history, making our motto

**"Restoring Family History...
One Photo At A Time..."**

Our mission is accomplished by our appearances at genealogy conventions, and genealogy societies throughout southern California. Our "Genealogist Corner" on our website is another venture in the efforts to help genealogist.
